Alma

HOTEL ZÜRICH SEEFELD

Dear guests,

thank you for choosing a Green Key certified establishment. Help us to further reduce our environmental footprint by following these simple tips during your stay. These are very easy – but they have a great impact on the environment.

Use our cleaning on demand service

To reduce the use of detergent, packaging, water and energy, we clean your room on request only. If you would like a room cleaning, please place the corresponding magnets on your door sign before 11 am. During cleaning, we will change your used towels, if left on the floor.

Help us separate waste

Waste is a resource that can be reused. Leave paper, newspapers and batteries in the room and place bottles and cardboard next to the bin.

Drink water from the tap

1 liter of drinking water from the tap sends 1000 to 2000 times less CO_2 into the atmosphere than 1 liter of bottled water. Our tap water meets high quality standards and can be consumed without hesitation.

Help us save energy

When leaving your room, please turn off the lights and switch off electronic devices (TV, chargers, laptop, etc.). Close windows during the heating season – keeping warmth where it belongs.

Use public transportation or bicycles

Bicycles, bus, train and metro are more environmentally friendly than cars. Information about public transportation and rental bikes can be found in the guest folder or at reception.

Experience green activities

Near our hotel there is beautiful nature, hiking, cycling or running routes or other green activities. Find your experiences online or ask at reception.

Together we make the difference! Thank you for your support.
